

# DESIGNING WITH HIGH-VIZ

## TIP #1

Bring 360 motion to your designs

Ensure High-Viz Reflective Film is visible from 4 sides. For maximum design flexibility and safety, outline the human form and highlighting joints. Be sure to focus on extremities for eye-catching motion to compliment your designs.

## TIP #2

Smaller sections are better

Avoid designing with full fabric. Instead utilize smaller sections of High-Viz Reflective Film - and more of them - to maximize safety and aesthetics.

## TIP #3

Segmentation is superior

Segmenting High-Viz Reflective Film offers many benefits including greater breathability, better wash durability, more stretch and recovery, and improved hand.

## TIP #4

Think flying colors and logos

Activewear designs will benefit from complementing your fabric color with the right High-Viz Reflective Film in just the right areas. Add your logo and you've got head-to-toe appeal and visibility.

## DESIGNING WITH HIGH-VIZ

The more you bring High-Viz Reflective Films to your activewear designs, the more you and your customers shine.
